

# SUPERCHARGE MICRO FOCUS

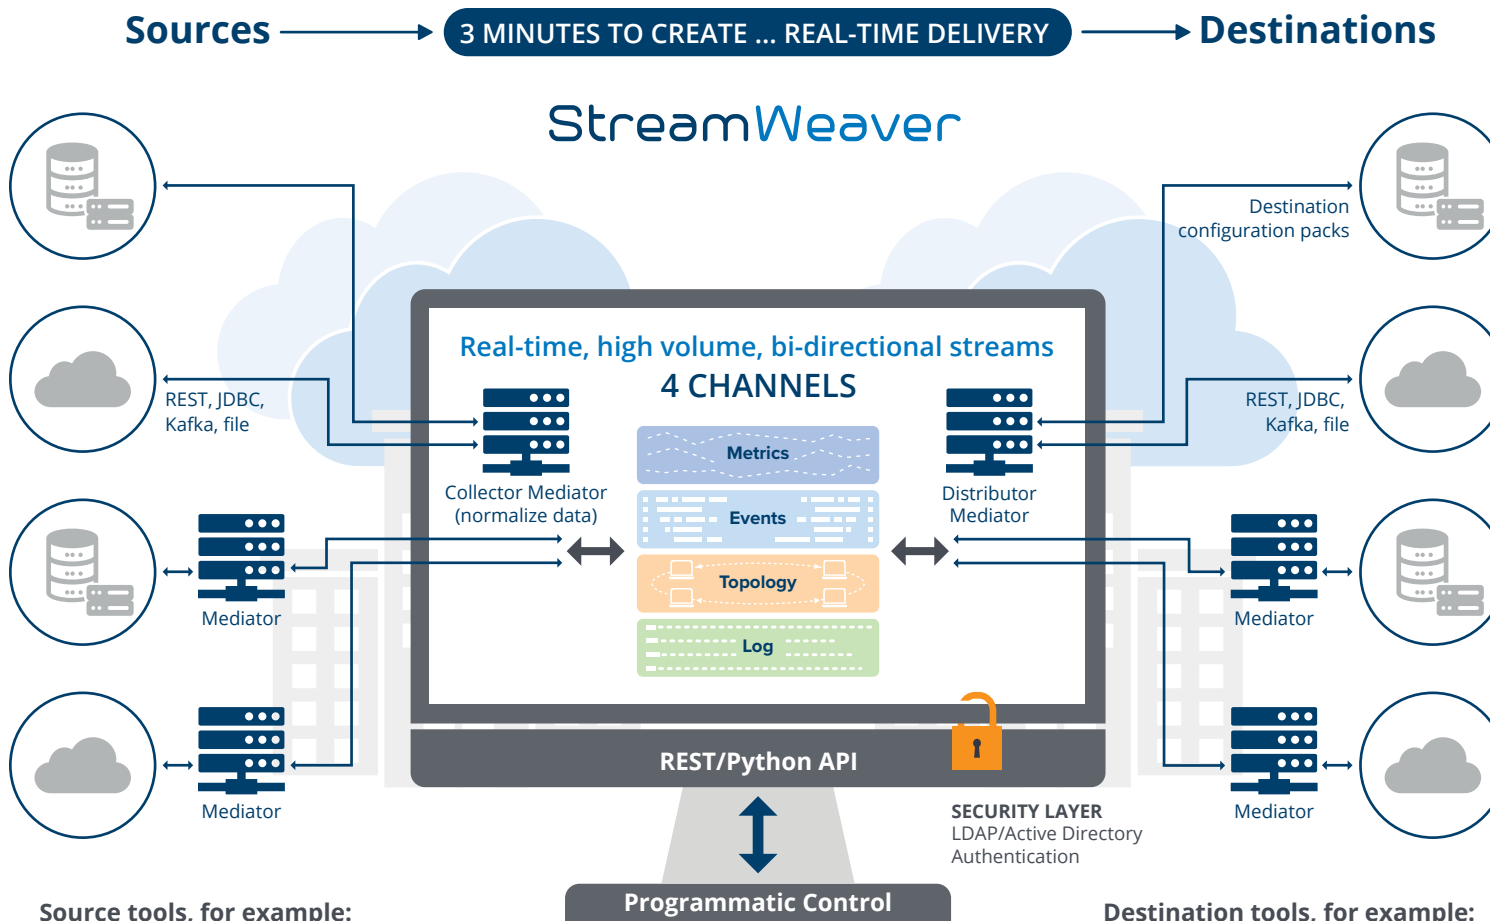

## Maximize the Value of your IT Ops Data

## Fast, Easy Automated Integrations

Micro Focus OpsBridge Suite provides the analytics-driven capabilities you need to sense, analyze, and adapt automated operations and enables you with high-level real-time visualization—but getting the maximum value is directly related to the breadth and depth of integrated operations data.

StreamWeaver efficiently feeds events, metrics, topology and log data from third-party tools into OpsBridge (and other destination targets), resulting in significant improvements in your ability to detect and resolve issues across the full stack — before they become service impacting.

Keep that data stream flowing with our **fault-tolerant, high-throughput, continuously available, horizontally scalable** enterprise architecture while avoiding the costs of building, and maintaining, brittle integrations.

### Source tools, for example:

- Network monitoring
- Application performance management
- Log analytics
- Database monitoring

### Destination tools, for example:

- Event managers
- IT Ops analytics
- Visualization
- Ticketing
- AI Ops

# StreamWeaver

**INTEGRATE**  
in just 3 minutes  
**GET A DEMO**

## INTEGRATE MICRO FOCUS OPSBRIDGE SUITE WITH THIRD-PARTY OPS TOOLS

# In Just 3 Minutes

StreamWeaver liberates your full stack operations data. With StreamWeaver, you can weave source data streams into OpsBridge or another destination, straight out-of-the-box. We can show you the start-to-finish integration in just 3 minutes.

**Click-and-connect capabilities** make this integration quick and easy and without need for costly application developers or consulting expertise. You can measure the time to integrate in minutes. The tools and applications below represent the current, out-of-the-box streaming mediators paired with OpsBridge. If you don't see something you need, let us know. We are continually adding sources and destinations and may already be working on it.
